Sensor Tester

Technical data	
Type designation	Sensor Tester
Article number	6510000048
Function	Sensor tester for DC 2-wire and 3-wire proximity switches Test function: Checking and indicating the switching status of a sensor with visual and acoustic signal
Power supply	9 V block battery (6LR61)
Output voltage	15 VDC, 20 mA stabilised
Enclosure	Modified enclosure of Series OR20
Temperature range	-25 °C/+70 °C
Input signals	NPN/PNP 3-wire, DC 2-wire, NAMUR

The sensor tester is used for checking 2-wire and 3-wire DC proximity switches. Coloured LEDs and an acoustic signal are used to indicate the switching statuses.

- Green LED: Operating voltage
- Red LED: Low battery
- Yellow LED: Sensor switching status

When not in use, the sensor tester switches off automatically after approx. 30 s.
